

Tongue Tie Combination Remedy

Ingredients

6 pellets of each of the following:

Aconitum 30C

Bellis perennis 6C

Bryonia alba 6C

Calendula 6C

Chamomilla 6C

Hypericum 6C

Staphysagria 30C

10 drops of Rescue Remedy

½ bottle of glycerin

The rest in filtered water

Directions for using the Remedy

One dose = 3-5 drops orally

Shake well before use

10-15 minutes before the procedure takes place, give your baby one dose of the Combination Remedy.

Immediately after the procedure, give one dose of the Combination Remedy.

After this, the Combination Remedy may be given as often as every 15 minutes if the baby is experiencing discomfort, distress or fussiness. Give only on an as needed basis. Remedy may be given as long as the baby experiences pain, discomfort or emotional distress due to the procedure.

Discontinue use if symptoms worsen or there is no significant change in symptoms after 3 days

Formulated in conjunction with Certified Lactation Consultants specializing in tongue tie, this combination of homeopathic remedies specifically addresses the physical and emotional trauma that may be encountered with frenotomy procedures, and may also result in shortened recovery time.

Why Homeopathy?

Homeopathy is a system of holistic medicine that stimulates the body to heal itself. It uses highly dilute solutions specially prepared from natural plant, mineral and animal extracts which are gentle on the body and produce very little risk of side effects. Homeopathy is ideal to use with infants, pregnant and nursing women, chemically sensitive individuals, and those seeking a more natural alternative to pharmaceuticals,

Aconitum - calming, to reduce pain and fear

Bellis perennis - for deep tissue healing,

won't go to breast, excessive crying

Bryonia alba - calms serous membranes and the viscera

Calendula - to soothe and heal the wound

Chamomilla - for deep wound healing

Hypericum - for nerve healing

Staphysagria - for fear and trauma
